DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on May 26, 2005 has been entered.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on May 26, 2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

Claims 1-37 are allowed.

The following is an examiner's statement of reasons for allowance:

After reviewing applicant's request for continued examination, submitted information disclosure statement and conducting an updated search none of the cited prior arts alone or in combination discloses the claimed laser irradiation apparatus having the recited limitations of independent claims 1-3,7,10 and 13, where the shape of the laser beam is modified before entering the cylindrical lens group for providing a uniform annealing laser beam.

Regarding claims 1,3,4,6-20,24-37,

None of cited prior arts discloses the combination of a beam generating unit, a cylindrical lens group for dividing the beam, an optical system for overlapping the divided beam and in particular modifying the beam by having a slit located between the beam generating and the cylindrical lens group for making edges of the emitted laser beam, thereby providing a beam with an even energy distribution.

Regarding claims 2,5,21-23,

None of cited prior arts discloses the combination of a beam generating unit, a cylindrical lens group for dividing the beam, an optical system for overlapping the divided beam and in particular modifying the beam by having the width of the cylindrical lens group narrower than the width of the emitted laser beam.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ARMANDO RODRIGUEZ whose telephone number is 571-272-1952. The examiner can normally be reached on 9:00 AM - 5:00 PM.
